High-achieving software engineer adept at creating positive outcomes across various industries. While at Eduplanet21, bolstered the platform by crafting user-centric functionalities and refining application performance. Before transitioning to technology, excelled as a medical device sales professional for nearly a decade, surpassing targets consistently through tactical marketing and tailored client solutions. A proficient communicator passionate about excelling in challenging, innovative settings, eager to offer a distinctive blend of experiences to your organization.

Technical Skills

Python • SQL • JavaScript • Django • Git • AWS(Certified Cloud Practitioner) • Java • React • Vue.js • APIs • Spring Boot • PostgreSQL • HTML • CSS • IntelliJ • Postman • PowerShell • Unit Testing • JSON • GitHub • BitBucket • Jira

Professional Experience

Eduplanet21

June 2022 - March 2023

Junior Software Developer

- Utilized Python and Django to create user-centric features, built robust APIs with Django REST, enhanced front-end with Vue.js, and ensured scalability using AWS S3.
- Debugged and resolved software defects to improve application stability and user experience.
- Worked with database relational modeling to ensure efficient data storage and retrieval, optimizing performance and scalability for the platform's data needs.
- Actively engaged in agile development processes, attended daily stand-up meetings, code reviews and collaborated with the team manager to design, develop, and maintain Eduplanet21's platform.
- Employed software engineering principles and testing methodologies to ensure high-quality software development.

Independent Med Reps

May 2012 - December 2021

Medical Device Sales in Philadelphia and the surrounding area

- Strategically promoted and sold products to meet customers' needs, achieving a 500% increase in sales volume.
- Effectively communicated strategic insights and updates to Regional Manager and fellow Sales Representatives, fostering collaboration and informed decision-making.
- Meticulously managed and maintained a sample inventory of products to be prepared to assist a customer whenever needed.

Education

Tech Elevator (Philadelphia, PA)

January 2022 - April 2022

- 14-week full-stack coding bootcamp focused on creating dynamic web-based software systems using Java, with 700+ hours of development education and application.

Certifications

AWS Certified Cloud Practitioner | Amazon Web Services (AWS) | May 2023
